Education

The Ohio State University

Bachelor of Science, Computer Science & Engineering, Columbus, OH

Expected Graduation: May 2025

Experiences and Leadership

Chief Technology Officer

Mindful Diagnosis, Columbus, OH

December 2022 – Present

- Proposed an innovative implicit bias software platform for a non-profit startup, aiming to empower physicians to assess and improve their awareness of biased treatments through interactive modules and resources.
- Accepted into two selective business programs at The Ohio State University, expanding expertise in entrepreneurship and startup development.
- In charge of software development of the platform, while leading a team of coders and providing guidance throughout the process.

Participant

National Cyber League

October 2018 – Present

- A cybersecurity Capture The Flag (CTF) competition, honing skills in areas such as log analysis, binary exploitation, open-source intelligence, cryptography, and more.
- Demonstrated impressive performance by achieving a commendable placement of 380th out of 5380 individuals from diverse colleges.

Research Assistant

Network-Based Computing Lab, Columbus, OH

June 2022 – August 2022

- Collaborated on updating the upcoming conference website, gaining proficiency in GitHub commands for version control. Developed fluency in HTML and CSS to enhance the website's design and functionality.
- Additionally, worked with Linux commands to configure network protocols for the lab's hardware infrastructure.

Research Assistant

Packet Wars, Kettering, OH

June 2021 – August 2021

- Focused on extracting valuable data from images across multiple search engines.
- Utilized Linux environment to code and implement steganography tools for analyzing image content and uncovering hidden information.

Projects and Awards

Personal Project

Portfolio Website – shahvraj26.github.io

June 2021 - Present

- Designing and maintaining the website utilizing HTML, CSS, and JavaScript, showcasing a range of projects and skills. Regularly updating the website to reflect latest accomplishments.

Participant

HackOH/IO Hackathon, Columbus, OH

October 2022

- Developed a safety application within a 24-hour timeframe that utilizes location tracking to identify and display the nearest emergency blue light from the user's current location.
- Secured 2nd place out of 200 competing teams.

Honors Fundamentals of Engineering School Project

Robot Project, Columbus, OH

January 2022 – April 2022

- Designed and modeled a robot using SolidWorks, programmed its functionality in C++, and constructed it from scratch to proficiently complete a series of assigned tasks.
- Recognized for our team's exceptional 83-page report, acknowledged as the top-written submission in an end-of-semester competition.
